

I'M JIM

FULL STACK DESIGNER

I was made by my lovely mom, and was born and raised in Taiwan.

I'm not just a designer, but nor am I just a programmer either. I like to try new things, celebrate difference, and make things look attractive. I attempt to create epic work, but at the same time also recognise that I am powerless on my own.

I like to be part of a great team, and relish the opportunity to build things together.

THE FRONT-END DEVELOPER AT JENDES SINCE 2018

I am in charge of revamping the interface of the e-commerce website in fashion area.

THE FRONT-END DESIGNER AT UKEAS FROM 2016 TO 2018

Project owner and a bridge between the marketing and IT teams, collaborating with both. Taking in charge of UX research, UI design, website layouts and interactions with coding.

THE UI/UX DESIGNER AT AI GROUP FROM 2013 TO 2015

Developed MOT and AI Group's enterprise information portal site. This included a storage system, project management tool, as well as various management reports, charts, and much more. Built the design guidelines and user-friendly interfaces, collaborated with project manager and back-end developers.

THE FREELANCE ART DIRECTOR AT GOAWAY IN MY SPARE TIME

Designed a travel journal Android app. Took charge of the logotype, user interface, icons, visual identity, design guidelines, and all website design. Raised this app with the owner which is a fantastic developer.

Z/VSE SYSTEM ENGINEER AT FUBON (TIIS) FROM 2010 TO 2012

Operated and maintained the IBM z/VSE system. My first job made me realize the power of design thinking and the value of management, also lead me to pursue my passion and my talent.

THE STUDENT AT TAMKANG UNIVERSITY FROM 2005 TO 2009

Received a Bachelor of Engineering in Electrical Engineering.
